Leaving No Stone Unturned.

EXPLORATION OF VERY HIGH-POTENTIAL **GOLD** AND BASE-METAL PROJECTS IN CANADA

Corporate Presentation
OCTOBER 2023

Disclaimer

Forward Looking Information

Certain information contained or incorporated by reference in this presentation, including any information as to our future financial or operating performance, constitutes "forward-looking statements". All statements, other than statements of historical fact, are forward-looking statements. The words "believe", "expect", "anticipate", "contemplate", "target", "plan", "intends", "continue", "budget", "estimate", "may", "will", "schedule" and similar expressions identify forward-looking statements. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by us, are inherently subject to significant business, economic and competitive uncertainties and contingencies. Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements. Such factors include, but are not limited to: fluctuations in the currency markets (such as the Canadian versus the U.S. dollar); fluctuations in the spot and forward price of gold or certain other commodities (such as copper); changes in national and local government legislation, taxation, controls, regulations and political or economic developments in Canada or other countries in which we do or may carry on business in the future; business opportunities that may be presented to, or pursued by, us;

operating or technical difficulties in connection with mining exploration or development activities; employee relations; the speculative nature of gold exploration and development, including the risks of obtaining necessary licenses and permits; diminishing quantities or grades of reserves; and contests over title to properties, particularly title to undeveloped properties. In addition, there are risks and hazards associated with the business of gold exploration, development and mining, including environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins, flooding and gold bullion losses (and the risk of inadequate insurance, or inability to obtain insurance, to cover these risks). Many of these uncertainties and contingencies can affect our actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, us. You are cautioned that forward-looking statements are not guarantees of future performance. All of the forward-looking statements made in this presentation are qualified by these cautionary statements. We disclaim any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except to the extent required by applicable laws.

Board of Directors & Management

Andre C. Tessier,
P.Eng., P.Geo

**PRESIDENT, CEO
& DIRECTOR**

B.Eng., M.Sc., +35 years experience in international exploration. Long term consultant for Cominco Ltd, Barrick, Teck, HudBay Minerals, Cogema - President, CEO and Director of Murgor Resources Inc. 2003-2015.

NI 43-101 Qualified Person.

Frank Candido
CHAIRMAN

B.A., +25 years financial consultant, specializing in the financing of private and public early-stage and micro-cap companies. President and founder at Direct Financial Strategies and Communications.

Nathalie Laurin
CFO

+25 years experience in administration, project management and accounting in the natural resources sector. Handling book-keeping, audit file preparation, management of legal, regulatory and administrative matters for many public companies.

Dr Kevin B. Heather
**INDEPENDENT
DIRECTOR**

B.Sc (Hons), M.Sc., Ph.D., +36 years experience in international exploration. - OGS, GSC, Barrick, founding VP geology at Antares Minerals and currently founding Chief Geological Officer at Regulus Resources Inc. and Aldebaran Resources Inc. **NI 43-101 Qualified Person.**

Sara Paquet,
BA, MBA
**INDEPENDENT
DIRECTOR**

Involved in the mineral exploration industry since 2007 as Global Sales Director at Fordia, a division of Epiroc. Extensive international experience in sales, distribution, logistics and human resources

Justin Reid,
P.Geo,
ICD.D
INDEPENDENT DIRECTOR

B.Sc (Hons), M.Sc., MBA, +25 years of experience in Mineral resource space. Mining Analyst at Sprott/Cormark Securities in Toronto, Director of Global Mining Sales at national bank and President and Director of Sulliden. Founder of Troilus Gold Corp where is currently CEO and Director. **NI 43-101 Qualified Person**

The Company In A Nutshell

Numbers at October 31, 2023

A Canadian Junior Exploring in Canada since 2019

Trading as DLTA-V
in Canada
(also trading on the
OTC in US as DTARF
and in Frankfurt 6G01)

101M Shares
Outstanding
(Fully diluted 146M)

Market Cap	11M CDN
Cash Position	7.0M CDN
Liquidity	225,000 to 2.6M / Day

12-Month Stock Chart

Projects

Delta-1 Gold

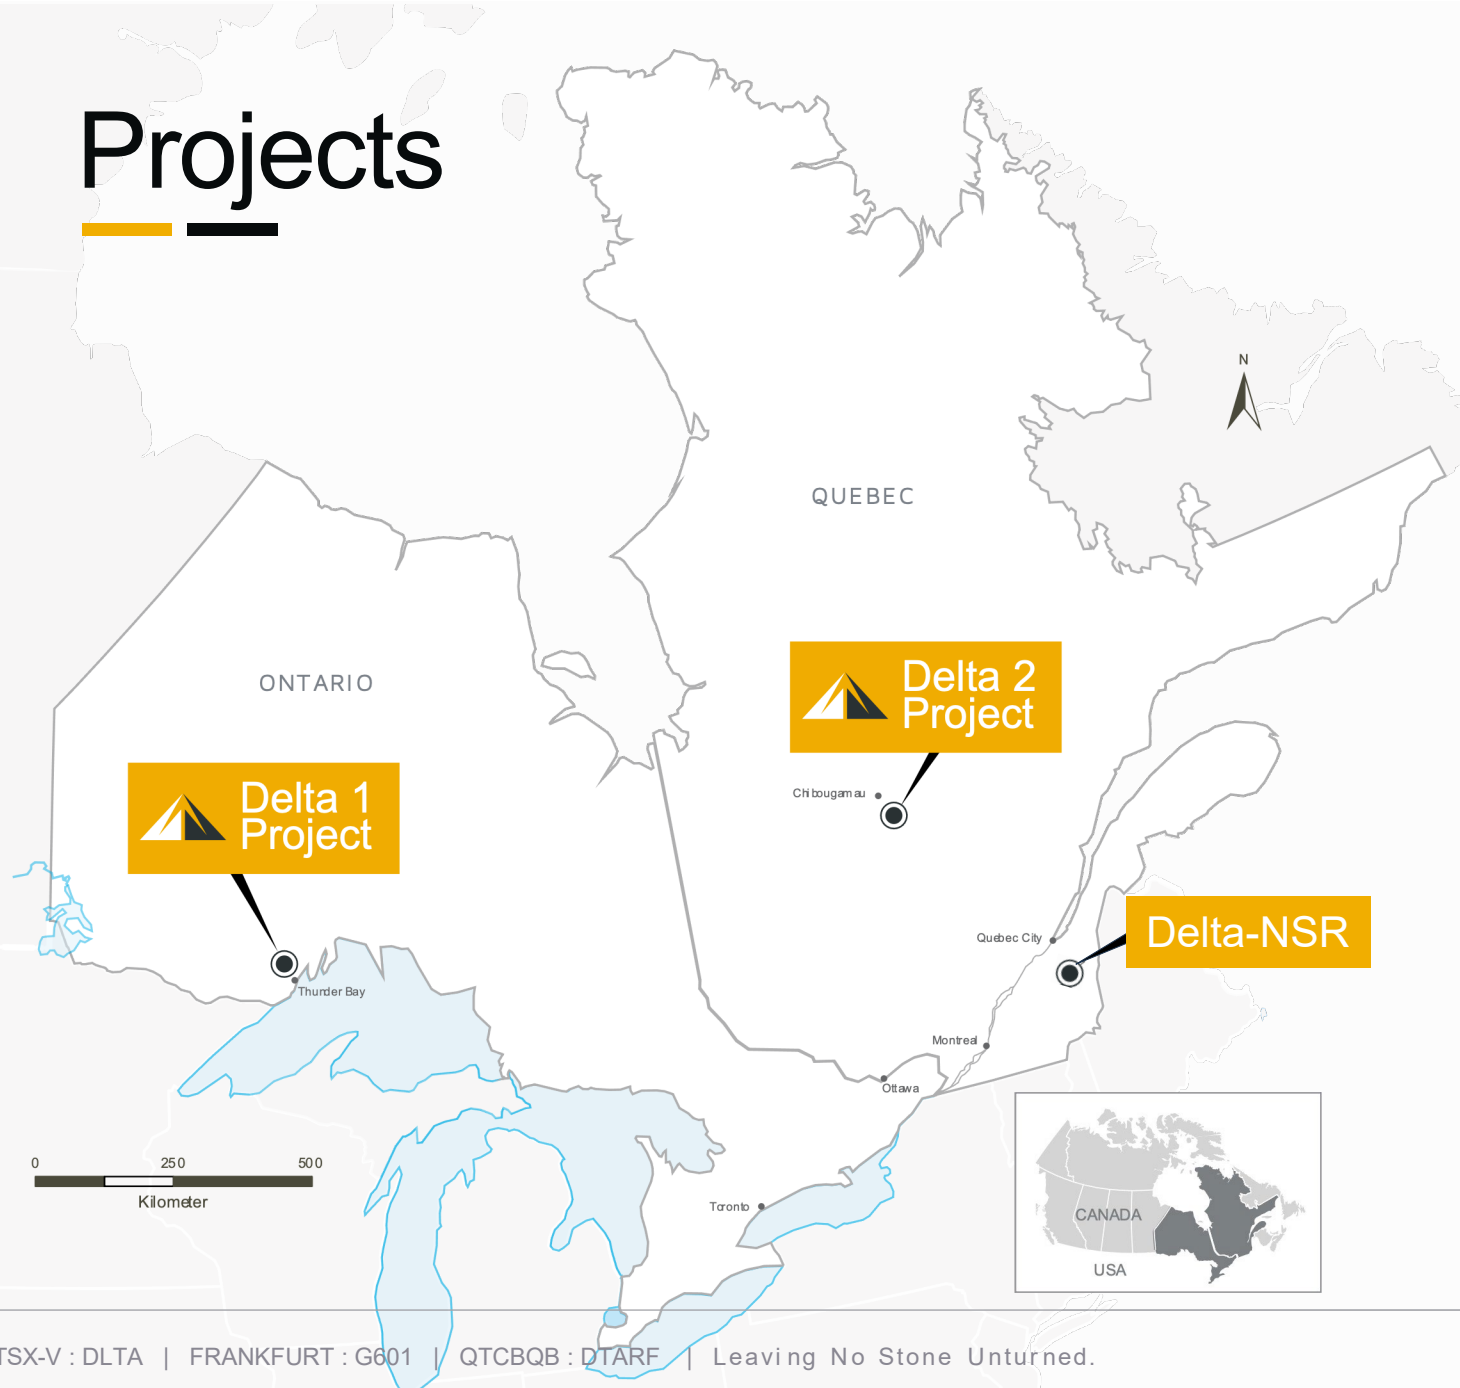

- 50 km west of Thunder Bay. Ontario.
- Delta owns a 100% interest | ~107 km²

Delta-2 Gold-Polymetallic

- 35 km southeast of Chibougamau, Quebec.
- Delta owns a 100% interest | ~194 km²

Bellechasse-Timmins GOLD NSR

- Delta owns a 1% NRS Royalty | ~50 km².
- 2.9MT @ 1.83 g/t Au Indicated (171,000 oz).
- 2.2MT @ 1.36 g/t Au Inferred (95,000 oz).

Delta-1 Location & Access

Delta-1 – GOLD PROJECT Thunder Bay, Ontario

- ***50 km west of Thunder Bay. Ontario.***
- ***Straddling the Trans-Canada Highway***
- ***Thunder Bay (~120,000 pop)***
- ***Delta owns 100% interest | ~107 km²***

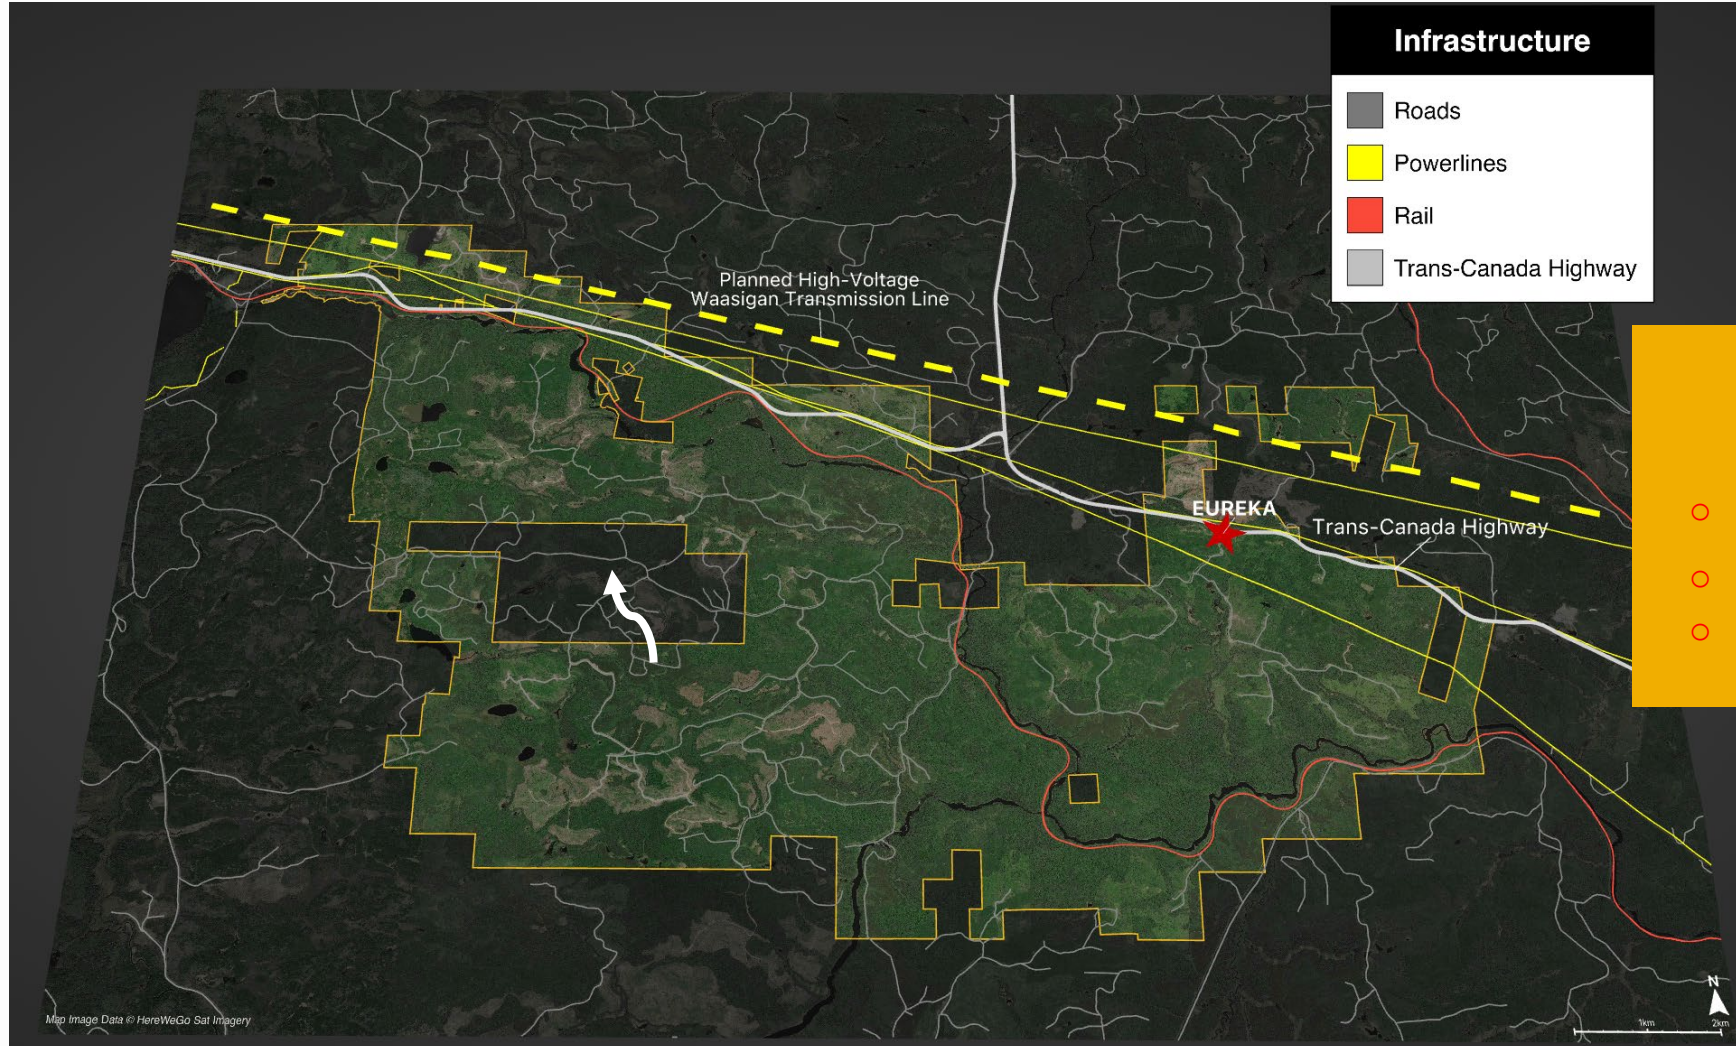

Delta-1 Location & Access

Delta-1 – GOLD PROJECT Thunder Bay, Ontario

- ***50 km west of Thunder Bay. Ontario.***
- ***Straddling the Trans-Canada Highway***
- ***Thunder Bay (~120,000 pop)***
- ***Delta owns 100% interest | ~107 km²***

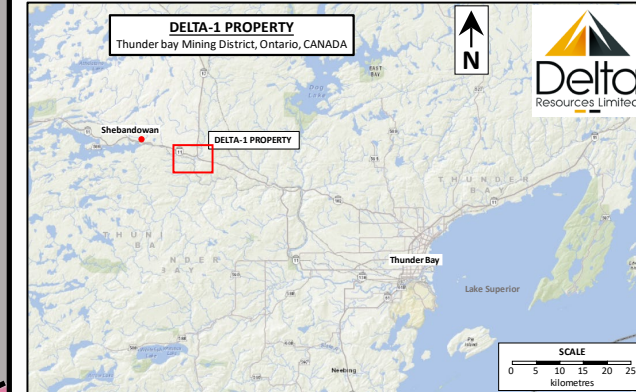

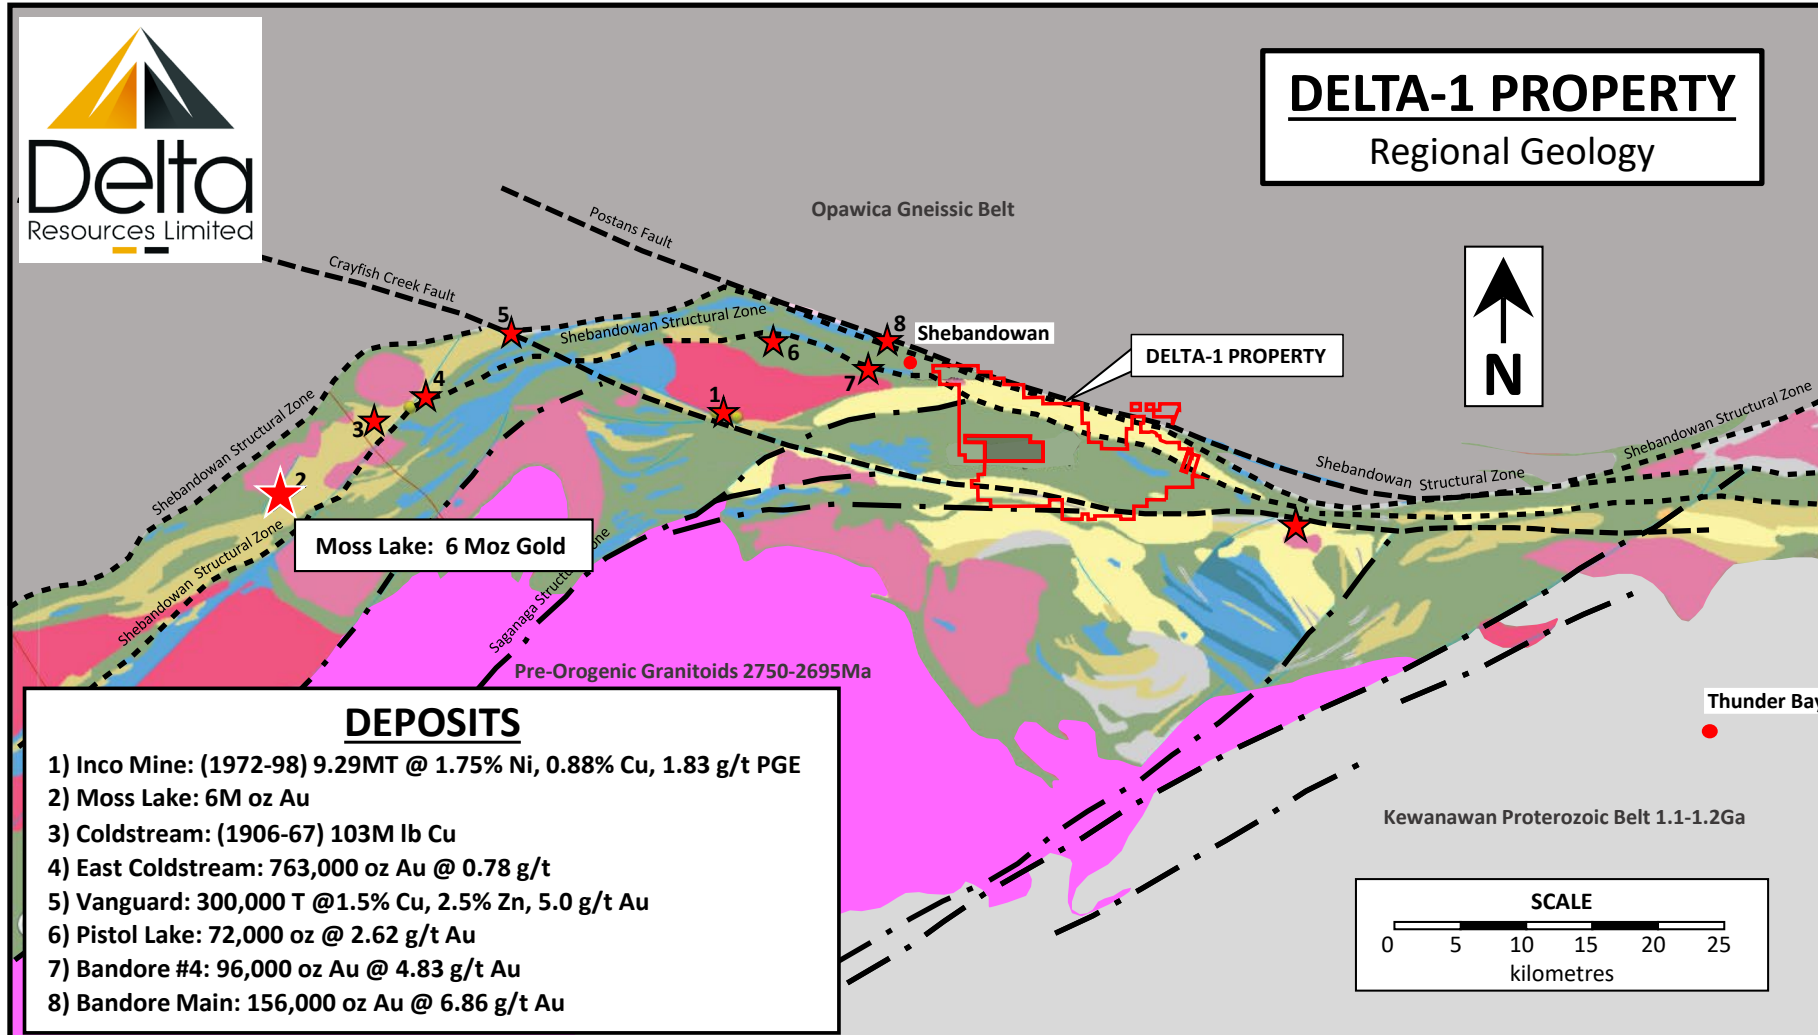

Delta-1 Proximity to Infrastructure

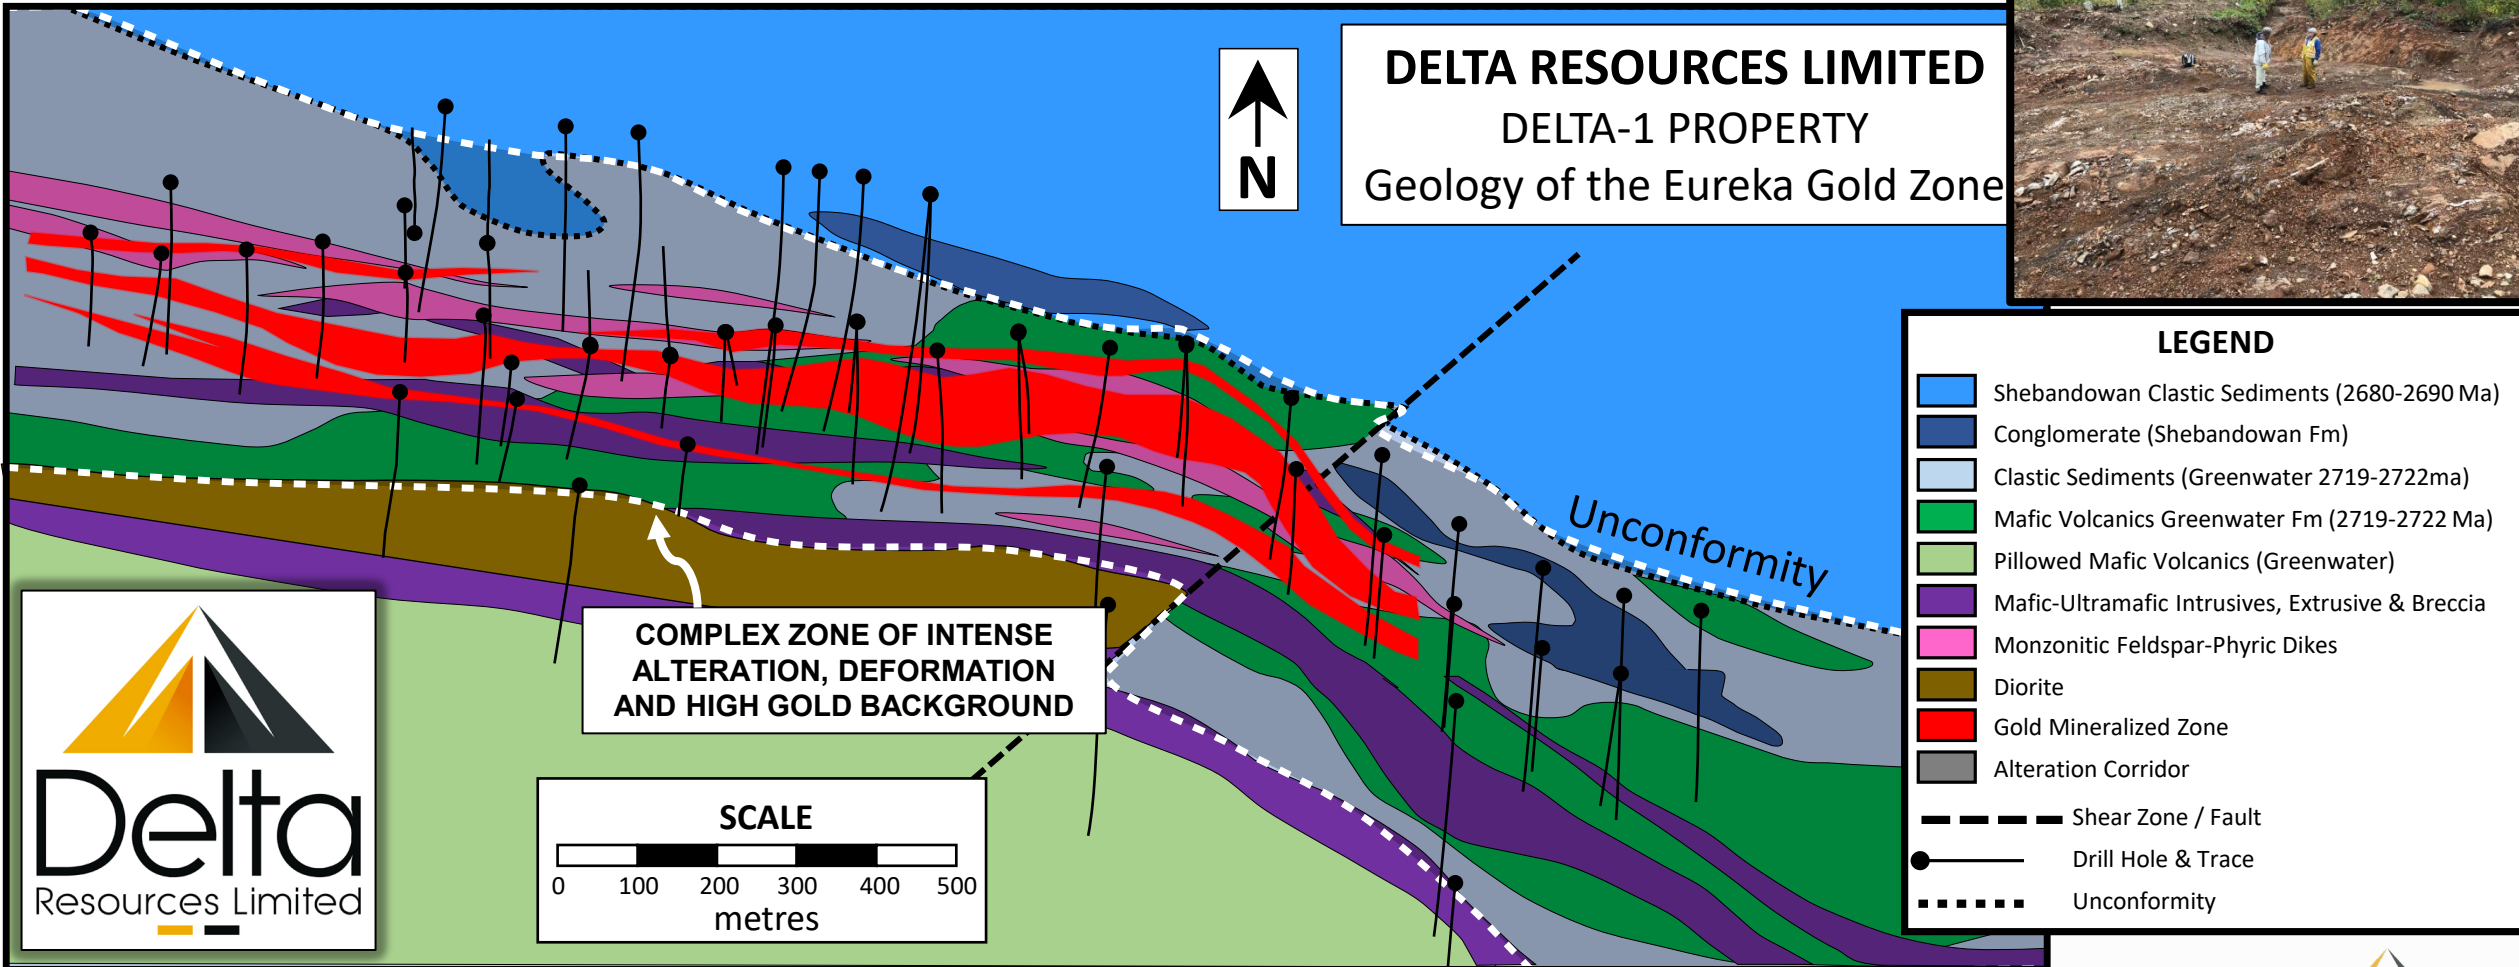

Delta-1 – GOLD PROJECT Thunder Bay, Ontario

- ***Adjacent to Trans-Canada Highway.***
- ***Two existing Power Lines.***
- ***Planned Waasigan High-Voltage Transmission Line.***

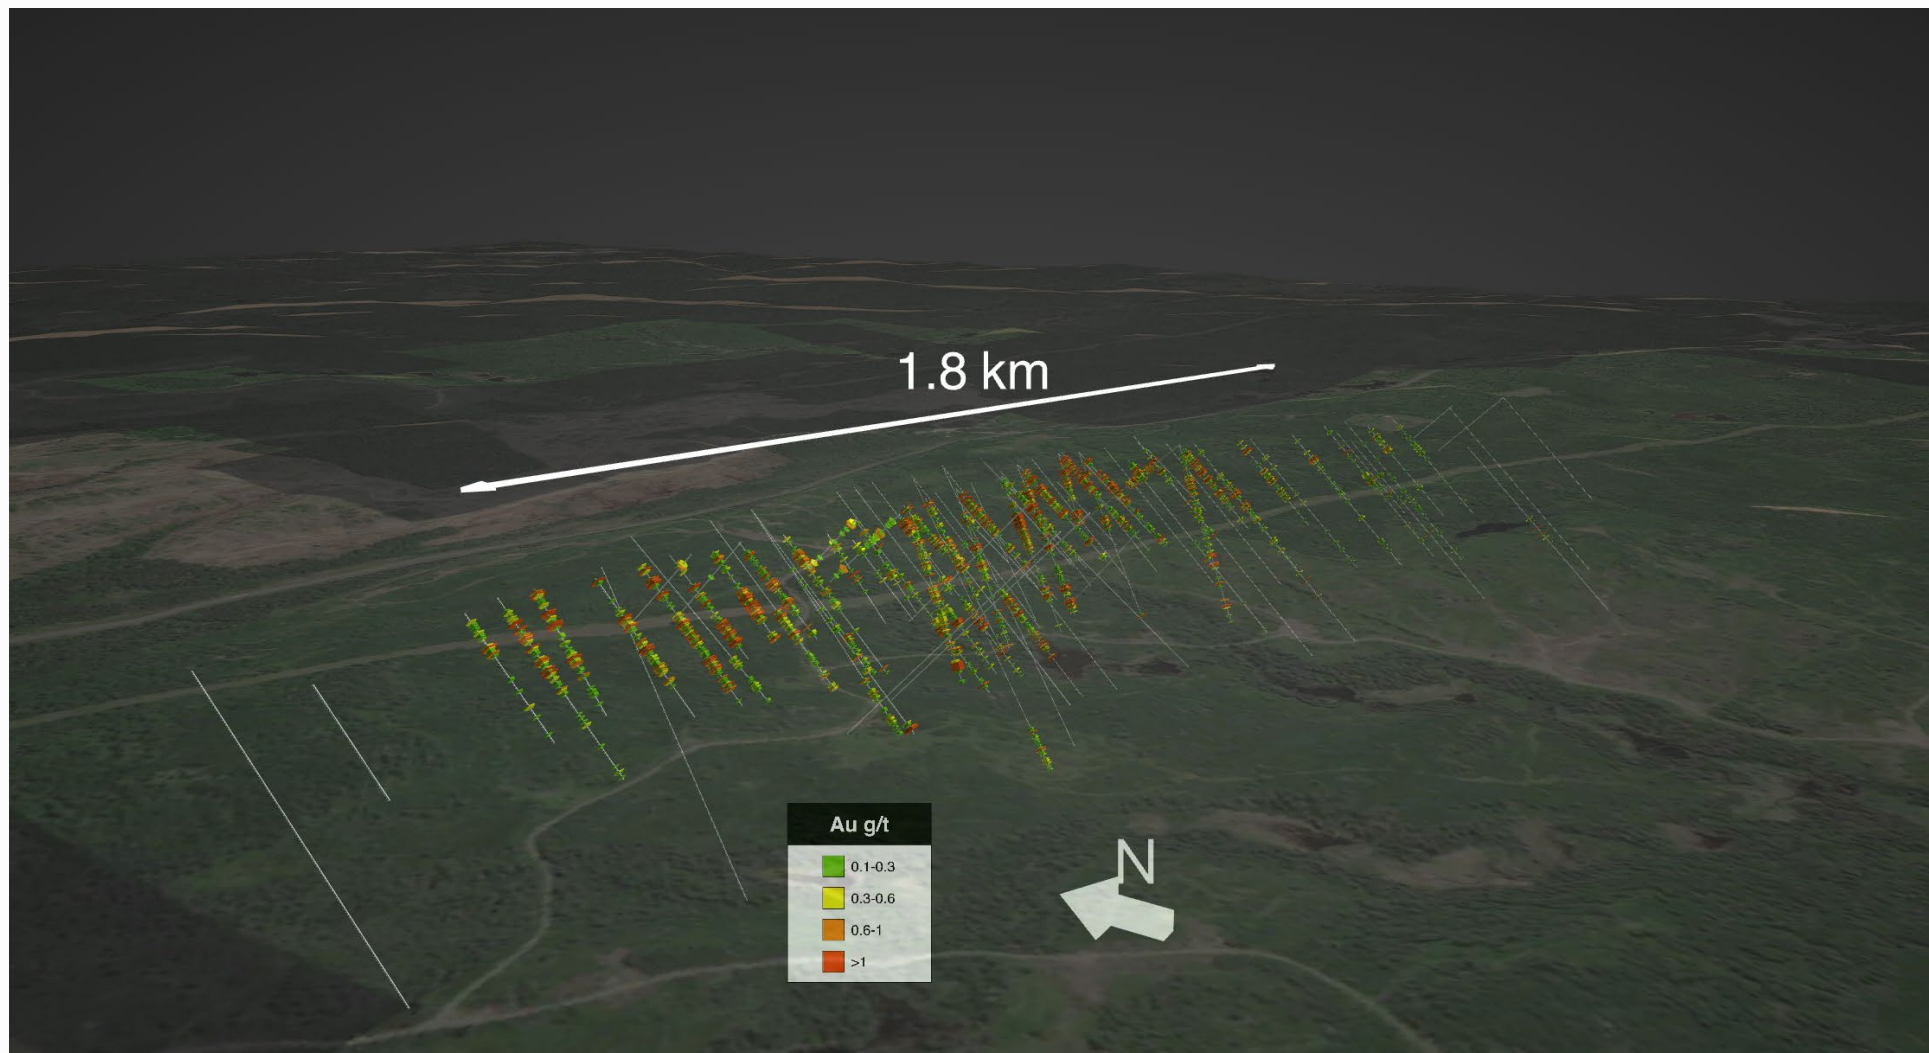

Delta-1 Regional Geology

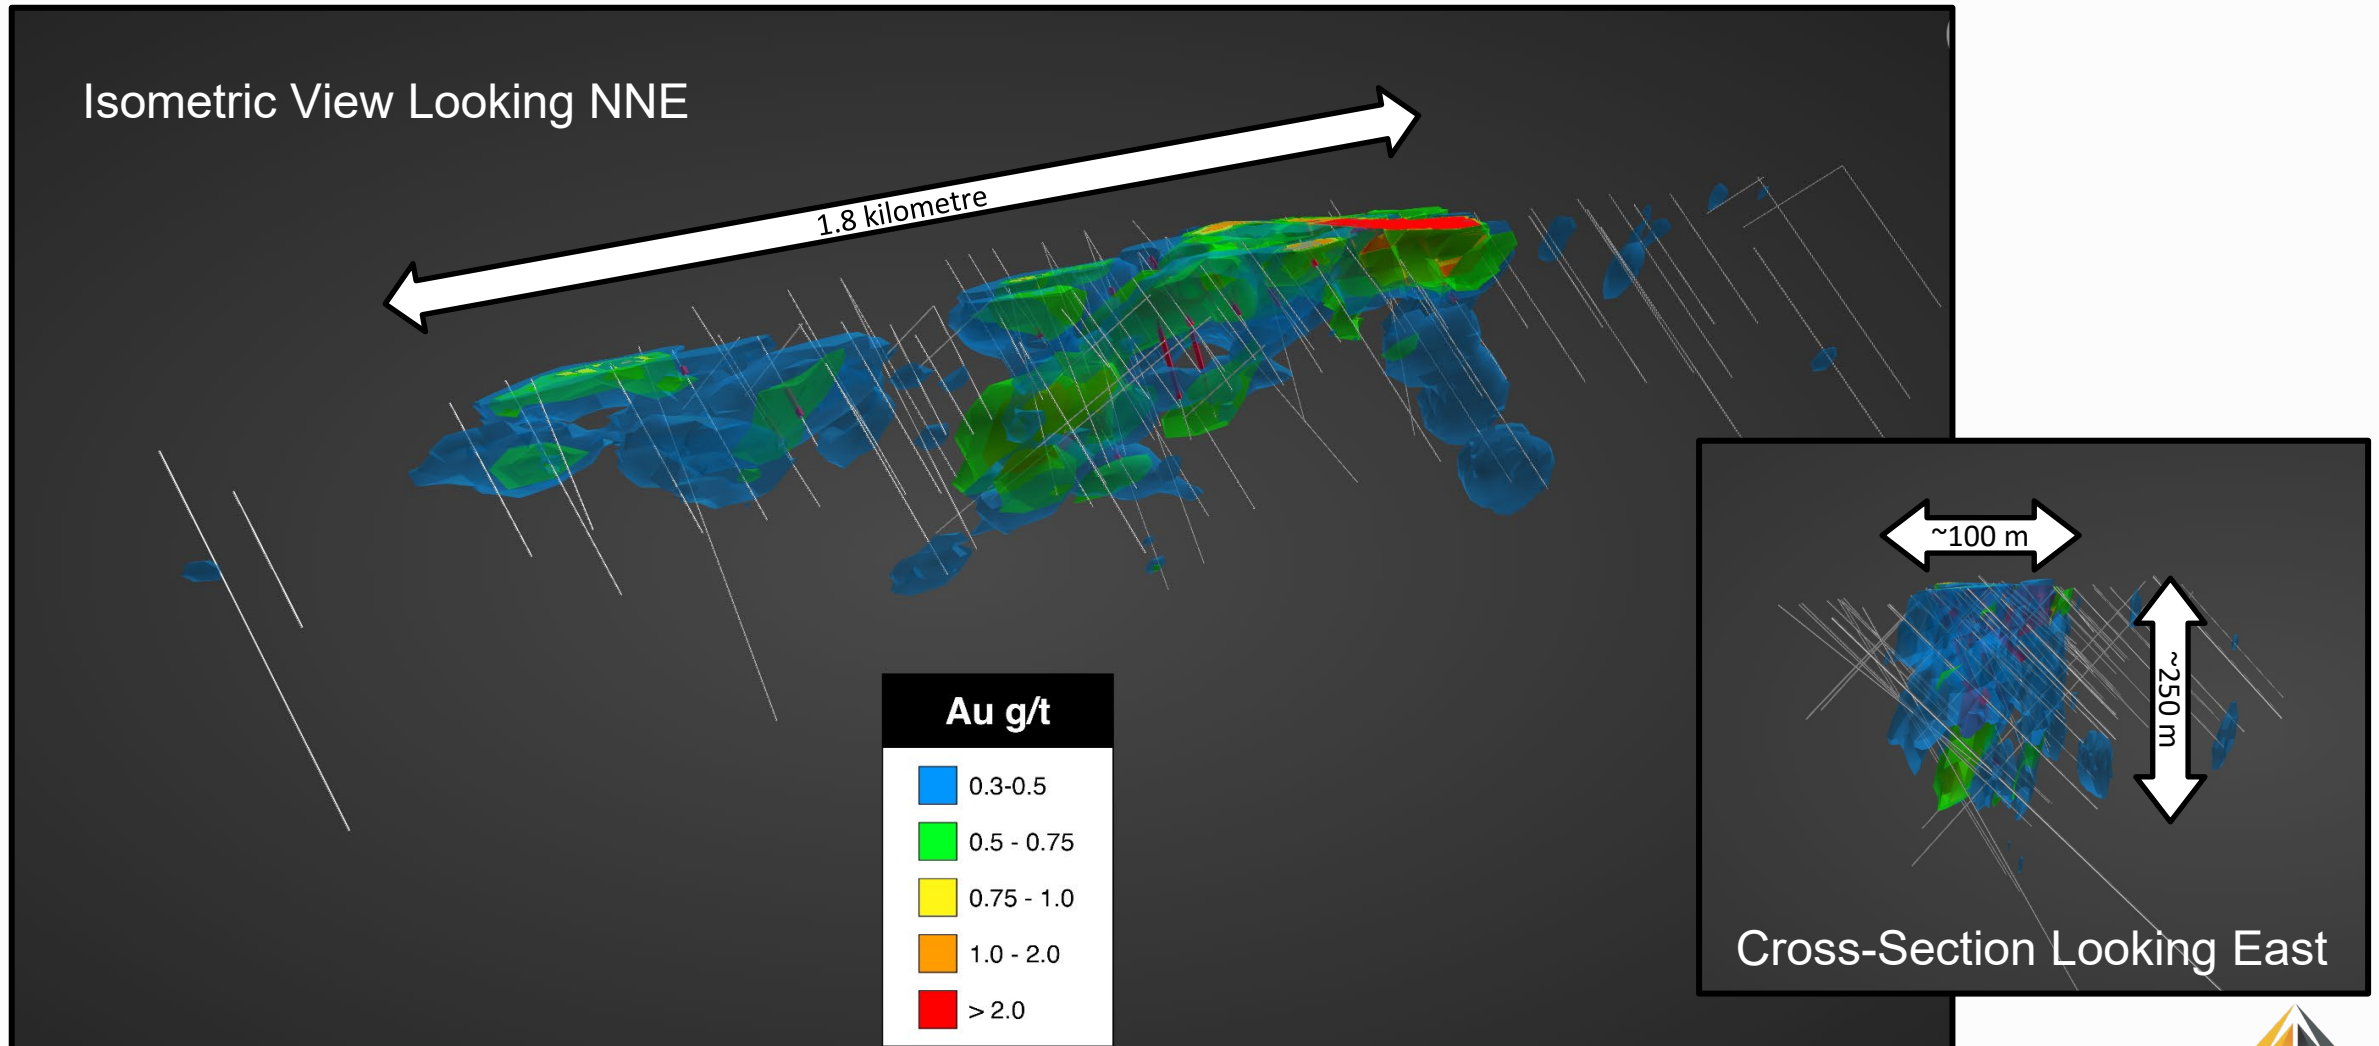

Delta-1 Gold Deposit Surface Geology

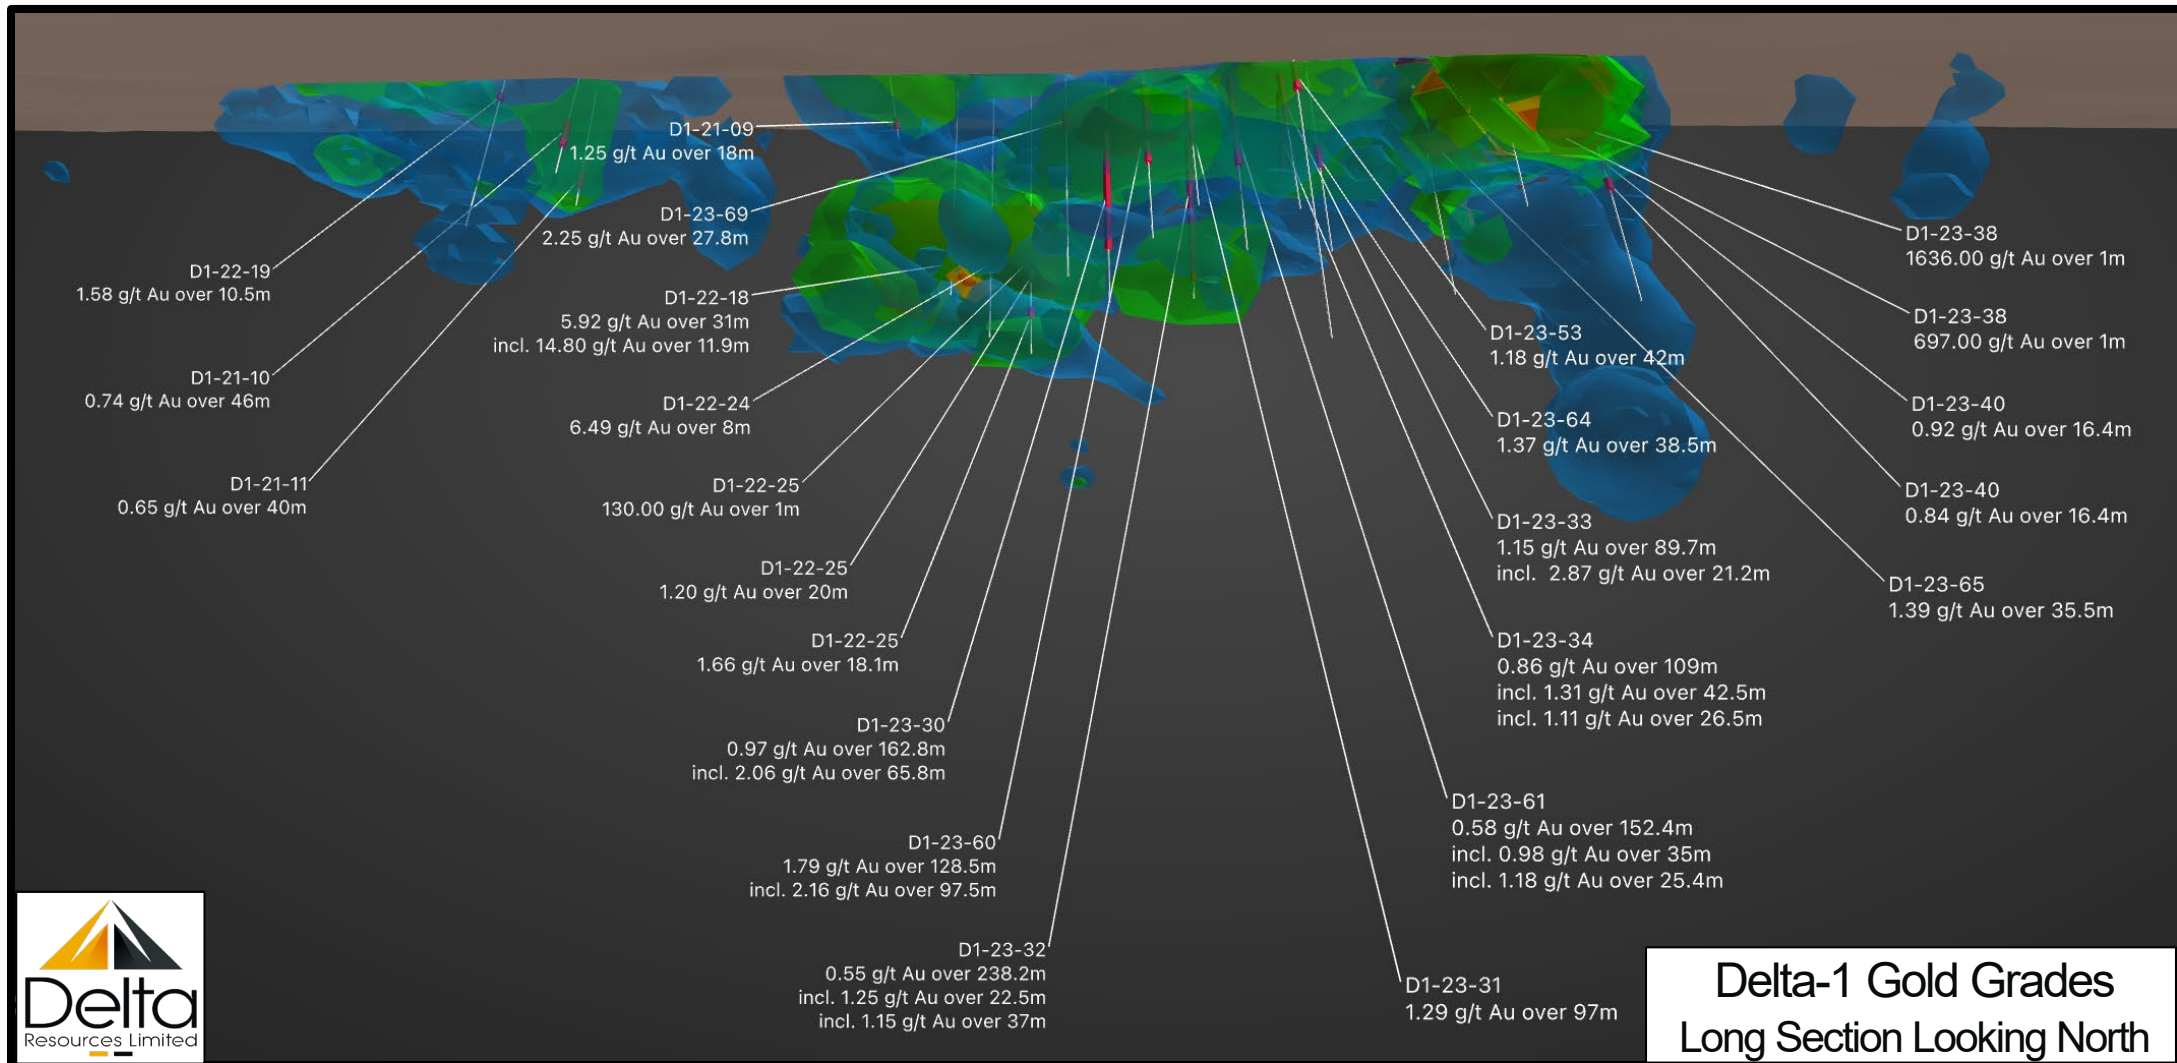

Delta-1 Gold Zone – Isometric View

Delta-1 Gold Mineralization-3D Model

Delta-1 Gold Grades & Long Section

Delta-1 Gold Mineralization-Stockwork

Drill Hole D1-23-30

Stockwork of quartz-ankerite-albite-pyrite veinlets from drill hole D1-23-30.

2.06 g/t Au over 65.8 m

Here the zone is hosted by altered Greenwater basalt.

ALTERATION

Ankerite-Sericite-Albite-Quartz
~2-3% Disseminated Pyrite

Delta-1 Gold Mineralization

Various drill-core samples showing several generations of gold-bearing veinlets within the mineralized zone.

Preliminary observations suggest that arsenopyrite-rich veinlets were early, followed by several generations of quartz, ankerite, ±albite, pyrite veinlets.

The multiple generations of veinlets suggest a number of mineralizing pulses, hence a long-lived mineralizing system.

Delta-1 Current and Future Work

2023 TO DATE

- **DRILLING:** Completed 60 drill holes for a total of 19,620 metre in 2023 (total of 86 drill holes for 26,288 metres since 2019).
- **DISCOVERY:** Defined the gold zone over 1.8 km x 10-100 m x 250 m vertical (open in all directions).

CURRENT

- **INDUCED POLARIZATION SURVEY:** Completing a 3D survey covering 4.5 km strike of the structural zone (results are pending).
- **TELEVIEWER:** Acquiring a wealth of structural data by probing 14 drill holes (results are pending).
- **COMPILATION:** Compiling and interpreting all available data at Delta-1 to define the signature of the gold mineralization.

2024

- **DRILLING:** Program planned for January 2024 to:
 - Expand the gold mineralized zone east, west and at depth (5,000 to 10,000 metres),
 - Explore the 4.5 km strike length of the never-tested structural corridor that hosts the gold zone.
- **PROPERTY-SCALE EXPLORATION:** Explore the remaining 95 square kilometres of the property (planned summer & Fall 2024).

Conclusion

Delta-1 Project

Location

- Located in a pro-mining jurisdiction.
- Immediately adjacent to Infrastructure.
- The area has been logged and mineralization forms a topographic high (ready for an open pit).
- Pro-mining Fort Williams First Nations.

Project

- ALL THE INGREDIENTS FOR A MAJOR ECONOMIC GOLD DEPOSIT.
- Crustal-Scale Structure with km-scale pervasive alteration and high gold background.
- Multiple pulses of gold mineralization.
- Defined Gold Zone 1.8 kilometres long with a true width of up to 100 metres.

Timing

- Just completed 20,000 metres drill program with assays pending for 15 drill holes.
- Currently at a Cdn \$11 Market Cap with \$7M in the bank.
- Still early-stage with less than 25,000 metres drilled to date (including early exploration)

People

- Dedicated team to add value for shareholders.
- Management with a track record.
- Technical Team Recipient of the 2022 Discovery of the Year Award in Ontario
